MEDICAL DEVICE Class IIa

TABLETS

Sollievo PhysioLax is a **100% natural** medical device **indicated for the treatment of constipation**. The product's action is achieved through its **combination of natural substances** that act on the **multiple functions normally used by the intestine to regulate transit**. Sollievo PhysioLax thus works through a **physiological and non-pharmacological mechanism of action**.

PHYSIOLOGICAL LAXATIVE ACTION

PROPULSIVE EFFECT
on intestinal transit

PROTECTIVE EFFECT
on the intestinal mucosa

- INCREASED INTESTINAL MOTILITY •
- INCREASED STOOL HYDRATION •
- INCREASED PROTECTION OF THE INTESTINAL WALL •
- MODULATION OF INFLAMMATION •

This **representation of the physiological mechanism of action** is the result of our **molecular and cellular biology studies** combined with **bioinformatics processing**.

Sollievo PhysioLax is produced **through completely natural manufacturing processes** that do not use solvents or other chemically synthesised substances.

COMPOSITION AND CHARACTERISATION

- **The Complex Sollievo PhysioLax** (made from Senna, Chicory, Fennel, Dandelion, Caraway and Cumin) **420 mg/tab.**
- **Sollievo PhysioLax is validated according to the following parameters:**

Metabolomic fingerprinting using NIRS (Near-Infrared Spectroscopy)

confirming the standardisation of the composition of the natural product

COMPLIANT

Adhesion Test

confirming the barrier and protective action on the intestinal cells

COMPLIANT

Polyphenolic complex with flavonoids and sennosides $\geq 3.1\%$

Contains 45 tablets of 420 mg each

INSTRUCTIONS FOR USE

Take 1 to 3 tablets in the evening, as needed, with a large glass of water. The correct dosage is the minimum required to stimulate physiological intestinal transit without producing liquid stool, and can therefore be adapted according to individual needs.

This product is recommended from 12 years of age.

To encourage intestinal transit, it is generally recommended to drink fluids throughout the day, eat the right amount of fibre and get plenty of exercise.

WARNINGS

Do not use in case of individual hypersensitivity or allergy to one or more components. Do not exceed the maximum recommended dose. Keep out of reach of children. If constipation persists, it is important to seek medical advice.

Store at room temperature in a cool, dry place, away from light.
